ABOUT CINNOVATECH

CINNOVATECH is a company for consulting and innovative technologies, part of BIT Limited Group. We provide innovative and tailored solutions for your business challenges through digital transformation. Our expertise and wide range of skills covers the domains of IT audit and consulting services helping you to shape a winning IT strategy, custom software development, design of modern and dynamic websites and mobile applications. Our young, dynamic, and versatile team designs, orchestrates and produces all your projects. We use the latest technological innovations to offer you the best possible solution for high-performance single-station, multi-station, network, and Web applications at competitive prices. We will design your solutions in close cooperation with your team members

MISSION AND VISION

For your digital success

Warranty Management IT

Our service offerings enhance customer experience throughout secure & highly functional end-to-end warranty management.

Product Engineering & Services

Develop and propose product improvements through periodical and accurate testing, repairing & refining every version.

Quality Control System

It's more than a responsibility but a guarantee from us to gain customer trust with highly reliable quality control system.

Infra. Integration Technology

At CINNOVATECH, we have a holistic and integrated approach towards core modernization to experience technological evolution.

OUR GOALS

Customer satisfaction is the backbone of a successful business

1 | Improve customer loyalty

2 | Increase customer service satisfaction rates

3 | Improve services quality

IT SERVICES

For your digital success

IT CONSULTING

Information technology (IT) consulting services help improve the performance, scalability and competitiveness of your company through right technology enablement and usage. CINNOVATECH can expertly guide your IT and digital transformation initiatives from strategy to implementation.

IT AUDIT

IT audit is an investigation of your existing system, report, or entity and is a review of your organization's IT systems, management, applications, operations, data use, and other related processes.

APP DEVELOPMENT

Application development services are aimed at designing, engineering, supporting, and evolving various software types. Serving mid & large enterprises and software product companies, CINNOVATECH develops quality software for retail, banking, manufacturing, healthcare, and other industries.

DESIGN

In each of its web design projects, CINNOVATECH shrewdly balances the technology, visual aesthetics and business objectives, bringing you fast-loading, impactful and high-converting online experiences.
